

ASSIGNABLE SQUARE FEET PER STUDENT STATION FOR CLASS LABORATORIES

TABLE 11

It is hard to assess the definition of an "average" class laboratory, even though average square footage and average student station sizes are used as guidelines. Institutions offering agriculture and engineering curricula tend to have larger laboratories with more area per student station than do those whose only professional programs are in education and business. It should be noted that differences in program offerings among institutions, particularly at different academic levels, often result in variations in the size of laboratory student stations among departments as well as among institutions.

The average student station per room is the ratio of the number of student stations (capacity of the room) to the number of rooms which have a room type of "210" (class laboratories). The square feet per student station is the ratio of total assignable square feet to the number of student stations. The assignable area is the sum of all areas of a building assigned to, or available for assignment to, an occupant. This includes every type of space functionally usable except that defined as custodial, circulation, mechanical, and structural areas. In this table only room types of "210" class laboratories are being used.

$$\text{Average Student Station Per Room} = \frac{\text{Number of Student Stations}}{\text{Number of Rooms}}$$

$$\text{Square Feet Per Student Station} = \frac{\text{Total Assignable Square Feet}}{\text{Number of Student Stations}}$$
